

CHAPTER-1: INTRODUCTION TO AI

Fundamental concepts of AI, history and evolution, types of AI, intelligent agents and applications.

CHAPTER-2: PROBLEM SOLVING

Search techniques, algorithms, heuristics and real-world problem solving.

CHAPTER-3: KNOWLEDGE REPRESENTATION

Logic, semantic networks, reasoning and inference systems.

CHAPTER-4: MACHINE LEARNING

Supervised and unsupervised learning, models and evaluation.

CHAPTER-5: AI ETHICS

Applications, ethics, bias, and future trends.
